(54) GRANULAR WASHING COMPOSITION

(57)Abstract:

PURPOSE: To obtain a granular washing composition suitable for automatic washing machine and having a high bulk density which is formed of a first granular component consisting of an anionic surface active agent and an inorganic or organic salt, and a second granular component consisting of a water-soluble surface active agent.

CONSTITUTION: This composition contains (A) 30-99 (wt.%) of a first granular component containing (i) 0.75-30% of an anionic surface active agent and (ii) 70-99.25% of an inorganic or organic salt and having a T95 value of 40-180 [T95 is the time (second) for attaining 95% dissolution of 1% mixture of the first granular component into distilled water of 20° C], and (B) 1-70% of a second granular component containing a water-soluble surface active agent, wherein the residue index in the total composition is 30% or less.
